Tatyana Novossiolo

Tatyana Novossiolo, PhD is a Research Assistant at the Division of Peace Studies, University of Bradford. She completed her doctoral research on a Wellcome Trust studentship. She is a co-editor of the Global Partnership-funded Guide, Preventing Biological Threats: What Can You Do, and an author of the Biological Security Education Handbook: The Power of Team-Based Learning. Over the past 6 years she has been actively involved in curricula development in arms control and biological security both for university and specialised professional training courses. She has served as a technical/scientific expert to the Landau Network-Fondazione Volta, Italy, and the International Federation of Biosafety Associations; held internships at the Bradford Disarmament Research Centre, UK, and the UN Biological Weapons Convention Implementation Support Unit in Geneva; and worked as a consultant with the Public Health Agency of Canada and the National Centre for Disease Control in Georgia. She is currently providing expert advice to the Palladin Institute of Biochemistry in Ukraine on the implementation of a UK Ministry of Defence-funded project, 'Education and Awareness-Raising in Ukraine'. She has published widely and presented numerous papers at international conferences.
