

## Who we are

CLIMVIB is a center of excellence in biomedical research with laboratories equipped with advanced technology platforms. The Laboratory can count on BSL3 and BSL 4 facilities and it is a national reference structure for emergencies in case of pandemics and bioterrorism.

Today the laboratory, thanks to the work of its team of 6 Doctors, 22 Technicians and 6 Researchers, has become a platform to discuss about new tools, new trends and new implementation opportunities on biosafety and biosecurity. The Institution continues to strive for improvements in harmonization and raising levels of biosafety and biosecurity standards and it is committed to producing accurate analysis and strategic programs on the subject. The institute's commitment to research can be appreciated by the scientific value and number of publications.

## Contact Us

Luigi Sacco University Hospital is located in the northwest area of Milan, just six miles from the city center. The hospital is located near the motorway exits of A4 (Turin - Venice) and A8 (Milan - Lakes) near Certosa.

# Laboratory Biosafety Training Course

9-13 November, 2015, Milan (Italy)

With the patronage of

UNIVERSITÀ  
DEGLI STUDI  
DI MILANO

With the patronage of

UNIVERSITÀ  
DEGLI STUDI  
DI MILANO

## Objective

The “**Laboratory Biosafety Training Course**” aims at training laboratory professionals in **biosafety and biorisk management** according to the highest international standards, promoting the knowledge and the dissemination of these standards in Italy and abroad, with particular attention to developing countries.

## Participants

The presence of about 20 (maximum) participants from all over the world is envisaged. Although candidates will have homogeneous **bio-medical background**, the variety of presented topics addresses the needs and interests of different professionals in the field of bio-risk management. Good command of **English** is required.

## Course Description

The “Laboratory Biosafety Training Course”, organized by the Chair of Clinical Microbiology (University of Milan) and by the Laboratory of Clinical Microbiology, Virology and Bioemergencies of Luigi Sacco University Hospital of Milan, will be a **five-day hands-on training course**. The programme offers a first complete analysis of **biological risk**, and an introduction on **biosafety and biosecurity** as sets of measures that can help manage biological risk. Then, the course will mainly focus on biosafety measures (facility design and construction, laboratory equipment, Personal Protective Equipment, Good Laboratory Practices, laboratory accidents, biohazardous waste management and regulatory aspects). The second part will offer the participants the opportunity to experiment what they have learned in the theoretical lessons with **tailored exercises** at our premises (BSL-2, BSL-3 and BSL-4 facilities).

# General Information

## Registration

Registration fees include access to all sessions and training materials (ECM credits for Italian participants).

Registration Fee	Before October 1 <sup>st</sup>	After October 1 <sup>st</sup>
Participants	€ 2000	€ 2500

## Course Secretariat

For further information on the Laboratory Biosafety Training Course, contact the Course Secretariat:
