Antonello Fadda

Antonello Fadda was born in Rome, where he is currently living and where he obtained his degree in Electronic Engineering from “La Sapienza” University. After a period spent in private companies as a design engineer, in 1985 he joined the Istituto Superiore di Sanità as a researcher. Presently he holds the position of Senior Research Scientist and is in charge of the section “Quality and Safety of Biomedical Technology”. His research work is mainly in the field of vision electrophysiology, where he develops and applies advanced methods for the functional evaluation of the diseased retinas. Moreover, as an ISS officer, he is deeply involved in public health and regulatory matters, including the assessment of hospital and biomedical facilities and the regulation of medical devices. Other professional competences include laboratory and experimental work, and health cooperation in developing countries, where he spent some years as an expatriate expert.
