Cristina Pagani

Dr. Cristina Pagani holds a MS in biology applied to biomedical research at the University of Milan. Since 2011 she is attending the specialization school in microbiology and virology of the University of Milan at the Laboratory of Clinical Microbiology, Virology and Bioemergencies of the “L.Sacco” University Hospital (Milan). Dr. Pagani gained experience in the use of molecular biology techniques applied to the microbiological diagnosis. Currently her main field of her research is on bacterial resistance mechanisms, focusing on the detection, diagnosis and confirmation of the presence of antimicrobial resistance mechanisms within the Lab’s surveillance program for the hospital acquired infections control. Dr. Pagani participates in research projects, she is also involved in the IHMA (International Health Management Associates) “TEST” research project. She has been involved as trainer during the theoretical-practical courses in the framework of CoE Project 3 “Knowledge development and transfer of best practice on bio-safety/bio-security/bio-risk management”.
